Our vision

The new Board of the Directors of the Hellenic Society of Obstetrics and Gynecology welcomes all its members to a new era of vision and progress. We start this new endeavor with great enthusiasm and encourage you to join us to launch new dimension of our specialty. The accelerated medical knowledge combined with the implementation of innovative solutions and the application of high throughput technologies, the constant changes of guidelines and the augmented needs from our patients are the biggest challenges of the new Board of the Directors.

Our vision is to encourage the spirit of the continued medical education via congresses and informative material through our website. We train on affiliations with Boards abroad and open the access for an international examination for sub-specialties in Obstetrics and Gynecology, and furthermore we intent to formulate the Greek guidelines for our specialty, based not only on evidence - based medicine but also on our country's economical, legal, cultural and medical particular features that are far different than other countries.

The new Board will keep extroversion. It is important, that all Gynecology doctors should gather under the Hellenic Society of Obstetrics and Gynecology. For that reason, the Board will support its members particularly in the county, concerning education and difficulties that characterize their medical practice. The Board will enhance the knowledge and expertise decision - making regarding specialty training, guidelines and open positions that the Ministry of Health should comply with.

Our Board consisting of distinguished academic physicians and scholars, will stave along with all members of our Society and the patient organizations to reach both the higher standards of professionalism and promotion for a better quality of life. ■
